Subject: [Non-DoD Source] Jennifer Field Report Solberg AFFF's

Hi Steve and John,

As promised awhile back, attached you will find the report on analysis for PFAS substances that Jennifer Field's laboratory conducted on our behalf. Included in the samples, are the exact same production batches of Mil-Spec 3% and 6% (Type 3 and Type 6) that were supplied to NRL for qualification testing as well as production batches of two of our commercial products. We ask only that you keep this information as business confidential among personnel of NRL and Naval Sea Systems Command.

If you have any questions regarding this report, please don't hesitate to contact me.

Best regards,

Mitch Hubert

Vice President, Product Development

The Solberg Company
